

Unifor believes that a responsible economic strategy that addresses the environmental issues resulting from its activities is essential for its success and for the satisfaction of its customers.

Unifor believes that constantly improving its environmental performance will lead to commercial and economic advantages, while at the same time satisfy expectations of environmental protection of the local context in which it operates.

Unifor's policy is to continuously improve its environmental performance, minimizing, where technically possible and economically viable, any negative impact of its activities on the environment.

Unifor intends to reach its goals through the following actions:

- Ensure that its activities are carried out in accordance with current legislation and codes of practice agreements;
- Implement and maintain an effective Environmental Management System in accordance with the requirements of UNI EN ISO 14001 2004;
- Implement all reasonable efforts in terms of organization, operations and technology to prevent air, water and soil pollution;
- Minimize the consumption of energy, water and materials and the production of waste, encouraging recovery and recycling where possible;
- Establish environmental objectives and targets, integrated with plant management and improvement programs;
- Ensure that the Environmental Policy outlined here and its Management System are understood, implemented and maintained at all organizational levels, and that the system is supported by regularly scheduled training programs;
- Ensure that this document is made available to the public.
