Lounge System

Lounge System is a collection of armchairs and two- and three-seat sofas, manufactured by Molteni&C for UniFor to satisfy the need to be able to work anywhere, in comfort and autonomy. All of the elements of the series feature a metal base with tall or low backs, upholstered in fabric or leather; in the case of the tall back, in extra-thick leather is also available. The version with the tall, wraparound back permits the creation of environments that are perfect for concentrating, solo work, or small meetings, also in crowded, noisy surroundings such as lobbies and open space offices.

The version with the low back offers every function necessary for making guests feel at ease in a modern office.

The various basic elements can be combined for a wide range of possibilities, from equipping an individual office with a small but comfortable lounge to configuring waiting areas in large public spaces.
