

Mobili MS

These cabinets with sliding doors are made in two versions: single-sided and double-sided.

The single-sided version presents two overlapping sliding doors on one side of the cabinet, while the double-sided version features one door on each side that slides to the left, along the back of the adjacent compartment. In the single-sided version, the cabinet has one lock at the front, while in the double-sided version there are two, one per side. The rails for the sliding doors are in nylon on aluminum, without mechanical elements. The cabinets are furnished complete with top with lock, base, sides, back, two adjustable shelves, and reinforced center vertical support. Both versions are available with cable management.

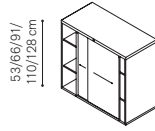

The two versions of the cabinet with sliding doors are available in three widths and five heights. For the containers with heights of 53.6, 66.1, or 91.1 cm, glass doors are also available; while for containers with heights of 110 or 128.6 cm, the doors are available only in Alubond or with natural wood finish.

The internal accessories for the cabinets with sliding doors include height-adjustable shelves, drawers, and pull-out rails for hanging folders. The series includes a printer cabinet as well as a recycling unit furnished with recycling bins.

These cabinets are compatible with the other UniFor systems, and thus they can easily be transformed into structural components.
