

## Mobili MT

### Mobile MT horizontal cabinet

Cabinets made with sides in polyurethane-finished laminate, with dent-resistant ABS edging in exposed areas. Base, top, and back in metal.

The front is closed by means of a horizontal tambour in extruded aluminum, with epoxy powder finish.

The shelves are in sheet iron with an epoxy powder coating. Metal brackets on either side of the cabinet permit the height of the shelves to be adjusted, and also accommodate file rails for hanging folders in a lateral configuration. Extractable file rails (optional) permit hanging folders to be inserted in a front-to-back configuration.

### MT vertical cabinet

Cabinets made with sides in polyurethane-finished laminate, with dent-resistant ABS edging in exposed areas. The entire structure, inside and out, is finished with epoxy powder coatings.

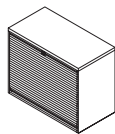

The front is closed by means of a vertical tambour door in extruded aluminum, with epoxy powder finish.

The shelves, in sheet steel with epoxy powder finish, are adjustable in height by means of holes in the internal structure of the cabinet. Extractable file rails (optional) permit hanging folders to be inserted in a front-to-back configuration.
