

Pyramid

Designed for large, open-space office configurations, Pyramid is an integrated cable management system that solves the problem of power and network access in a practical and rational manner, including connection points for electronic devices directly over table top. This elegant electrified structure also serves as a divider and organizing element between workstations. A wide range of hanging accessories can be added to optimize the work area in terms of efficient use of space, comfort, and ergonomics.

Pyramid is a patented system made entirely of materials with low environmental impact. Most of the components are in aluminum, of which 73% recycled. The distinctive triangular section of the tall Screen is designed to improve its acoustic performance by absorbing sound waves on first impact, resulting in a quieter and more pleasant work environment. Conceived as an independent modular element available in three heights and various functional versions, Pyramid is designed to integrate perfectly with a wide range of UniFor furnishing systems, providing important advantages in terms of versatility, flexible installation, simple reconfiguration, and personalization.

C.F. bookcase

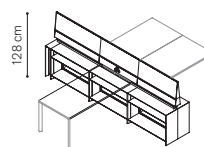

Composition 1 with bookcase C.F.

214x61 cm

J PYC 214

Composed of 2 modules C.F.
cm. 100 and 1 technical module
