

UniFor

Serie Neutra

Containers in sheet iron with epoxy powder coating, in various sizes and heights. The interior shelves, in the same material, are supported by brackets at either side, which can also accommodate hanging files. The brackets permit the shelves to be adjusted at 2.5 cm height intervals.

The doors, in bent sheet iron, are equipped with a lock with removable pawl. A master-key option is available on request. The esthetics of the cabinets, which presents the same edge finish along both the doors and the back, makes it possible to position several containers in a row, with the doors on alternating sides. The cabinets are equipped with height-adjustable feet.

Neutra drawer pedestals

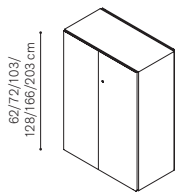

Drawer pedestals in sheet metal with epoxy powder coating.

Drawers in sheet metal with the same finish, with ball-bearing slides.

Drawer fronts in folded sheet metal. Interchangeable cylinder lock with master-key option. Screws with anti corrosion treatment. The drawer pedestals can be furnished with casters or glides. All of the drawer pedestals can support the table tops.
