Flipper Bench

Flipper task table with straight edges. The desk-table can be provided with a cable management system, consisting of grommets on the worksurface and baskets below. The perimetral legs, in extruded aluminum with drop-shaped section, feature a polished or natural finish or epoxy powder coating. They are available in fixed-height and adjustableheight versions. The contoured center legs, shared by two tabletops, permit the passage of cables from the floor to the cable baskets below the table top.

The workstations can be separated by a divider panel. The aluminum strip along the top of the panel is designed for mounting shelves, containers for small items (folders, trays), and a hinged monitor support arm.
