Naòs

The Naòs series includes tables and desks for prestigious office environments, including boardrooms, meeting rooms, executive offices and reception areas, as well as a modular bookcase system in both wall-mounted and double-sided freestanding versions, complete with exclusive functional elements and refined accessories.

Naòs

Tables

Support structure in extruded aluminum with triangular section, with epoxy powder finish in a choice of colors or polished aluminum surface. Legs with triangular section and height-adjustable foot, and internal tie rod for assembly purposes. Top in tempered glass, 12 mm thick, or in wood.

Desk-tables with structure in 8 x 8 cm triangular profiles and large conference tables with structure in 10 x 10 cm triangular profiles. The height of all Naòs tables is 67.5 cm. One of the legs can be used as a cable riser.

Naòs Bookcase

Wall covering system with continuous shelving, with natural wood finish. The stackable modules have a fixed height of 40 cm. The bottommost element, which forms the skirting, supports the first shelf at 11 cm from the floor. A pre-drilled aluminum profile is embedded into the upper part of the wall covering at distances of 20 cm.

The uppermost shelf is supported by a 10-cm-high wall covering, but upon request the wall covering can reach the ceiling.

The modular shelves are available in the lengths 80 cm, 120 cm, and 160 cm. Other lengths can be furnished upon request.

The series is completed by vertical and horizontal cabinets with doors in extra-clear satin-finish or clear glass.

NP Bookcase

Wall-mounted bookcase with back panel, 44 cm deep. The wall-mounted paneling is fitted with ample shelving in polished aluminum profiles, attached using special connection systems. The containers in natural wood, in the versions with doors and drawers, are designed to slide along the shelf for positioning as desired.

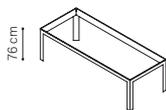

NA Bookcase

Bookcase without back panel, 33 cm deep. The NA bookcase in the refined version with concealed structure integrated into the wall, emphasizing the lightness of form of the polished aluminum shelving. It is completed by elegant sets of drawers in lacquered aluminum, available in two sizes (40 and 80 cm wide).

NB Bookcase

Single-sided and double-sided freestanding bookcase. With its strikingly clean lines and lightness of form, the NB bookcase is a freestanding modular structure with shelving and vertical dividers in polished aluminum, firmly fixed to the stainless-steel base. The shelves, the form of which reproduces the original version in wood, are equipped with a system of sliding glass doors and recessed LED lighting.
