LessLess

The LessLess series, an evolution of the Less series, consists of a modular system of tables, desk tables, and workstations with support for data technologies, drawer pedestals and filing cabinets for use in task areas, executive offices, conference rooms and boardrooms. They stand out for their lightness of form, superior technical performance, and environmental qualities.

The table takes the form of a monolithic structure made entirely of aluminum. The legs consist of extruded L shaped profiles while the table top is built from folded sheet-aluminum. The legs and top are assembled together by means of a special fastening system that ensures elevated safety and technical performance.

Made in both rectangular and square forms and in various sizes, the table can be used as a desk, in both executive and task-area versions, or as a conference table.
