Touch Down Unit

TDU @ work

Touch Down Unit is a self-contained mobile workstation that is easy to move around the office, making it adaptable to continuous changes in layout and spatial configuration.

TDU presents itself as a simple, compact form, consisting of a rectangular table top over a small closed volume that opens during use to reveal two containers with various accessory elements that support and complete the workstation.

The metal structure of the mobile unit consists of a base with a wired center upright, while the upright supports the structure of the table top. Vertical and horizontal positioning devices allow the user to adjust the height and position of the table top so that it is comfortable and ergonomic for every type of activity. The upright can be fitted for recharging electronic devices.

To facilitate moving the workstation, the base is mounted on retractable 360° swivel castors.

The table top is available in wood, back-painted glass, or Fenix laminate. Its height can be adjusted from 74 cm to 104 cm, and it also slides horizontally for use from the long or short side, depending on the user's position and work modality (seated on an armchair, office chair or stool, or standing).

The two accessorized containers are open when the mobile workstation is in use, providing access to various handy features. The first container can be rotated 180°, revealing an open compartment in the cabinet with a lockable door. The second container slides horizontally on hidden tracks, exposing another compartment and shelving on which to store documents, electronic devices, and personal belongings.

Touch Down Unit

TDU @ home

American walnut and leather, warm, enveloping colors, were selected for Touch Down Unit for domestic environments. A discreet and personal place, a nest in which to keep one's things, a place to work, a place to carve out time of one's own.

A door provides access to electrical and USB outlets. The home version includes a compartment for inserting a power bank.

Contoured trays in solid wood and leather keep small objects organized and can be easily repositioned in the side cabinet when not in use.

Touch Down Unit's range of finishes and accessories make it a perfect fit for every type of home and professional environment.
