Consiglio

The Consiglio table (1991-1994) was originally designed by Aldo Rossi for his Milanese studio on Via S. Maria alla Porta. An essential architecture that becomes "domestic" when its proportions are reduced, without losing its monumental character.

Entirely finished in American cherry wood, the Consiglio table has an aluminium internal structure which guarantees its maximum stability on the larger dimensions. The legs, square in section and with rounded edges, are slightly set back from the corners of the tabletop, available in rectangular and square shape.

Consiglio, with its clean lines and structural strength, allows the design of large meeting tables and fits easily in both corporate and domestic ambiances.
