MDL Light

MDL Light is a system of task workstation tables with straight edges. The table top of the desk-table can be equipped with cable passages and baskets below the surface for cable management, with easy access through special hatches. The contoured legs are in extruded aluminum with a polished or natural finish or epoxy powder coating. Raceways within the legs permit the passage of cables from floor level to the cable management baskets below the table top.

The workstations can be separated by a divider panel. The aluminum strip along the top of the panel is designed for mounting shelves, containers for small items (folders, trays), and a hinged monitor support arm.
