A system of large modular tables designed for meeting and conference rooms as well as flexible collective spaces, Element 03 is designed to foster collaboration and the sharingof resources.

ELEMENT 03 **FOSTER + PARTNERS**

The modular structure of Element 03, in painted aluminium, consists of a central part and two cantilevered side elements. Additional modules can be added to configure tables of any length.

The cantilevered side elements are engineered with gradually reduced thicknesses that permit overhangs of 120 cm without affecting the high performance of the tables in terms of stability and stiffness. The work surface is available in back-painted extra-clear etched glass or with a natural wood finish.

The contoured legs, which taper from below the work surface towards the floor, also serve as cable risers. The cable management system includes a cable raceway along the centre of the table structure. Hatches installed flush with the work surface provide access to power and data ports, including HDMI and USB connections.
