The MS series consists of single-sided or double-sided cabinets with a rational, minimalist design.
Their clean lines and practicality make them suitable companions for all of UniFor's products.

MOBILI MS   **UNIFOR DESIGN**

The single-sided version features two overlapping sliding doors and a lock with removable core located on the front side of the top. The double-sided version has one sliding door per side.They slide from right to left, overlapping with the back of the adjacent compartment. In this case, each of the two compartments has its own lock with removable core, positioned on each side of the top.

Both versions, in melamine laminate, steel, or wood, are available in various sizes and heights and include a central reinforcement panel. The sliding doors are finished to match the structure of the cabinets, while the rails are in aluminium with a nylon profile.

The cabinets are completed with shelving that can be installed at various heights, a drawer, and file holder frames. The series also includes a printer station configuration, as well as a recycling station configuration complete with recycling bins.

The modularity of the MS system makes it easy to transform the cabinets into structural support components that can be combined with other elements from the various UniFor furnishing series.

SINGLE-SIDED SLIDING DOORS CABINETS

Single-sided MS cabinets length 100 cm
Shelves not included

100×48×H53 cm
U MS 100 53 M ..
