The MT cabinets feature horizontal or vertical tambour doors. Their clean, monolithic forms make them easy to coordinate with all of the UniFor furnishing series.

The lateral panels of the cabinets are in polyurethane finished melamine with dent-resistant ABS edging in the exposed areas, while the top and the back panel are in powder-coated sheet metal. The vertical or horizontal tambour door, composed of a series of powder-coated aluminium slats, comes equipped with a lock with removable core. The shelving, in powder-coated sheet metal, is furnished separately. Metal brackets on either side of the cabinet permit the shelving to be installed at varying heights.

In the horizontal version, a pull-out file frame is available for hanging files in a front-to-back configuration. The top of the cabinet can be personalized to fit the characteristics of the work environment by adding a top with a laminate or natural wood finish.

The 180-cm-wide version of the vertical cabinet features two tambour doors positioned side-by-side.
