Release Date
2023

Conceived for high-end office environments, TDU, designed by Studio Klass, meets the needs of professionals who do not require an allocated workstation.

Alternating between meetings and individual tasks, these dynamic workers need a foothold within the office that they can return to throughout the day.

TDU @ WORK

Touch Down Unit is a self-contained mobile workstation that is easy to move around the office, making it adaptable to continuous changes in layout and spatial configuration.

TDU presents itself as a simple, compact form: a rectangular worktop over a small, closed volume contains two cabinets that open during use to reveal various accessory elements. The structure of the mobile unit consists of a metal base that supports a central upright with cable housing. In turn, the upright supports the structure of the worktop, which contains vertical and horizontal positioning devices that permit rapid adjustments on the part of the user. The workstation can be easily moved about thanks to its retractable 360° swivel castors.

The worktop can be adjusted in height between 74 cm and 104 cm. It also slides horizontally to facilitate working from either the long or short side, according to the user's position and work modality (standing or sitting).

The two containers open to provide access to various handy features. The first container can be rotated 180°, revealing an open compartment in the cabinet with a lockable door. The second container slides horizontally on hidden tracks, exposing another compartment and shelving on which to store documents, electronic devices, and personal belongings.

TDU is also available in an electrified version, with a small door that reveals the power sockets, USB and USB-C ports for recharging electronic devices.

TOUCH DOWN UNIT

STUDIO KLASS

TDU @ HOME

The Home version of Touch Down Unit features warm and elegant materials. This version includes a compartment for inserting a power bank.

A small door provides access to the power sockets and USB ports for recharging electronic devices. Contoured trays in solid wood and leather keep small objects organized. They can be stored in the container after use. TDU's range of finishes and accessories make it a perfect fit for every type of home and professional environment.
