Technical Data Sheet

Release Date
10 2025

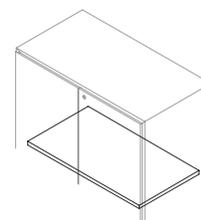

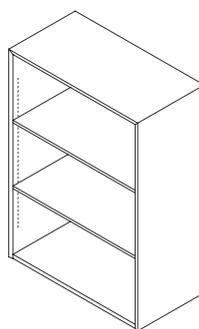

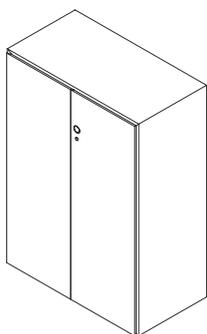

The C.SK collection, designed by Studio Klass for UniFor, reinterprets the concept of storage through an essential and sophisticated design language, blending geometric precision with maximum functionality. These elements integrate seamlessly into modern work environments, adapting to any space without being visually intrusive, while achieving a perfect balance between lightness and structural solidity.

Entirely crafted from painted metal, the C.SK storage units offer a modular solution for technical furnishing, adapting to different configurations—from mobile drawer units on wheels to low storage units, and from cabinets with doors to open shelving systems.

Every detail is carefully designed to ensure ergonomics and usability, featuring discreet opening mechanisms, interated lock systems, and internal accessories developed for efficient and intuitive space organisation.

A distinctive element of the collection is the iconic 45° frame, which houses the drawer handles, becoming a recognisable graphic feature across the entire range. The meticulous work on thickness, angles, and shadow play lightens its visual presence without compromising sturdiness.

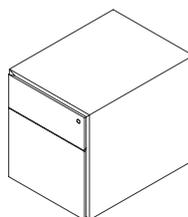

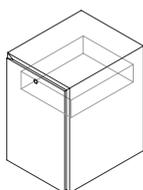

Designed to meet storage and organisation needs in contract, corporate, and institutional spaces, C.SK combines cutting-edge production technology with attention to detail, in a perfect synthesis between industrial design and craftsmanship. The result is a collection that maintains its essential function, while evolving through a contemporary approach.

**CABINETS****Door cabinets, only on glides**

Shelves not included

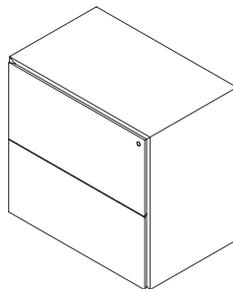

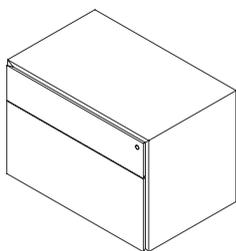

90x48xH73 cm
CSKMA001 ..90x48xH110 cm
CSKMA002 ..90x48xH128 cm
