Winner of the Compasso d'Oro ADI in 1998, Flipper is a modular table system that stands out for its minimalist forms and carefully designed structural details. A limited number of components within a single assembly system combine easily to respond to every project requirement. Solid, stable, and lightweight, Flipper tables are designed to meet the needs of a dynamic, constantly evolving office environment.

Flipper table desks are available in various sizes and with rectangular, square, or L-shaped versions. The work surfaces are in wood or laminate, both with solid wood edges.

The name Flipper was inspired the shape of the table legs in section, which recalls the flipper of a pinball machine, a 1950s American arcade game. Made of extruded aluminium, the legs of Flipper tables are available in various finishes in both the fixed-height and adjustable-height versions.

The workstation tables in facing configurations can be separated by a divider panel, the upper edge of which is designed for hanging accessory equipment.

Flipper also includes a series of meeting tables in various sizes and shapes, with wood or laminate finishes.
