2025

First created expressly for the Cartier Foundation in Paris, the Less series of furnishings is characterised by compositional rigor and elegant forms reduced to their essence.

A modular system, Less was conceived to inhabit the contemporary workplace but not only. Less tables, containers, and bookcases are solid metal structures defined by clean lines, smooth surfaces and compact silhouettes.

Tables

The Less table is configured as a monolithic structure made entirely of metal; the legs consist of steel bars in L-shaped profiles, 8 mm thick, while the top is made entirely of folded sheet iron.

Available in both rectangular and square forms, in various sizes and two different heights, the table can be used as a meeting table or as an operative desk, the latter in both executive and workstation versions, also in L-configurations, with additional worktop.

Drawer pedestals

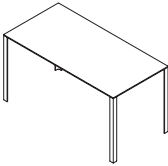

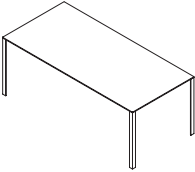

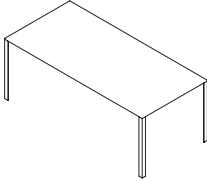

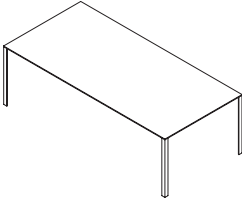

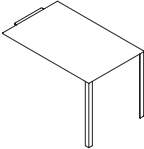

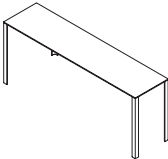

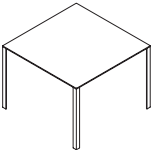

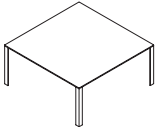

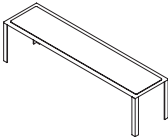

The drawer pedestal is equipped with skid feet, or wheels upon request, and has three drawers, one of which for hanging folders. A fall-front door at the rear provides access to a space for cable management.

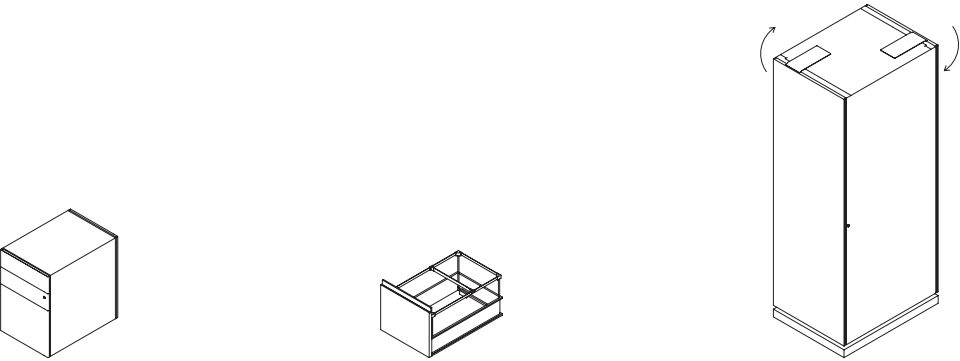

Totem

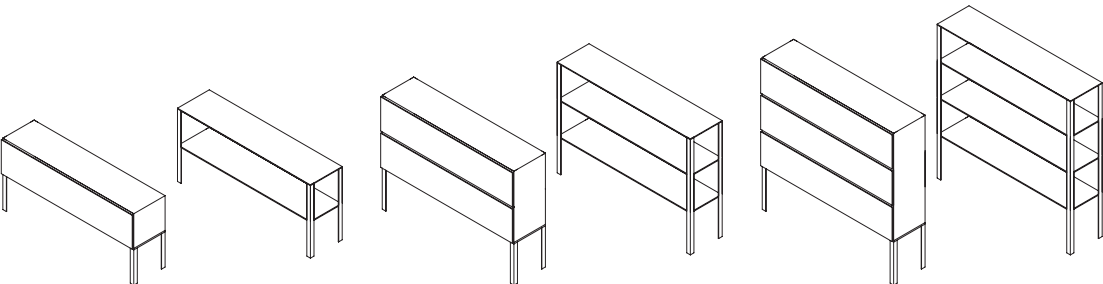

Totem is a tall swivel cabinet on a fixed base with two compartments created by a vertical internal partition, accessible by means of doors on opposite sides. The doors feature a special opening mechanism with combined rotation and lateral movement. Each cabinet has eight metal shelves.

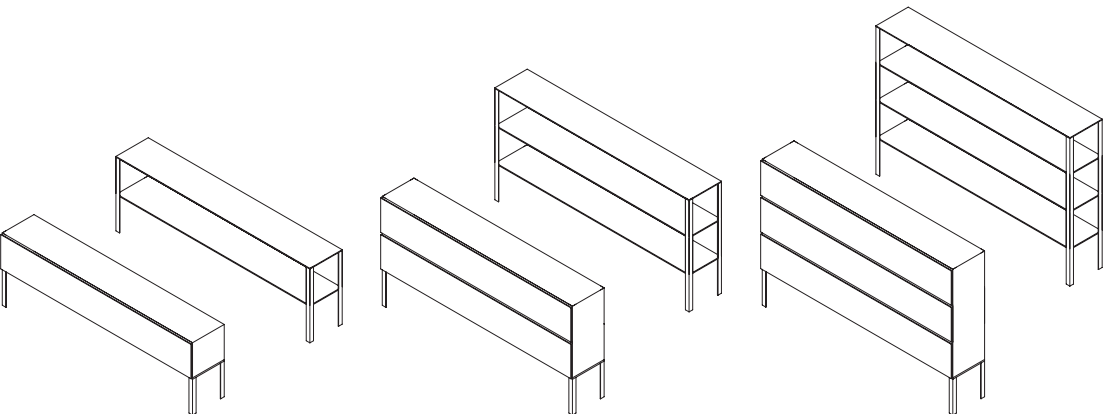

Bookcases

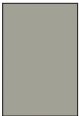

The Less bookcase consists of folded metal shelves fixed firmly to slender L-shaped metal uprights. Produced in various lengths and heights (with two, three, or four shelves), the bookshelf is available in a completely open version or with fall-front doors which serve, in the open position, as handy surfaces for consulting reading material.
