Technical Data Sheet

Release Date
2025

The Naòs series includes tables and desks for prestigious office environments, including boardrooms, meeting rooms and executive offices, as well as a modular bookcase system in both wall-mounted and freestanding double-sided versions.

Tables

Naòs tables are available in various shapes and sizes, all with a support structure in extruded aluminium with an 8x8 cm or 10x10 cm triangular section, finished in polished aluminium, with epoxy powder in a choice of colours, or with wood veneer.

The legs are also triangular in section and have height adjustable feet. Each leg has an internal tie rod for assembly purposes and can be equipped for cable management. Naòs tables are available with tops in tempered glass, 12 mm thick, or in wood.

Naòs Bookcase

Consisting of a wall structure with a natural wood finish, the Naòs modular bookcase takes the form of a boiserie, the functional elements of which are fixed directly to the wall: continuous shelving with a constant height of 40 cm high, auxiliary work surfaces, and aluminium cabinets with glass doors. The total depth of the bookcase is 36 cm.

NP Bookcase

The NP Bookcase consists of wall-mounted panelling fitted with ample shelving in polished aluminium profiles, attached using special fixing systems. The containers in natural wood, available as sets of drawers or as cabinets with doors, are designed to slide along the shelf for positioning where desired.

The bookcase can also be fitted with an LED lighting system. The total depth of the bookcase is 44 cm.

NA Bookcase

The NA Bookcase is a refined variation with no back panel, as the aluminium structure is concealed within the wall.

The lightness of form of the polished aluminium shelving is emphasised by the elegant sets of drawers in lacquered aluminium, available in two widths: 40 and 80 cm. The total depth of the bookcase is 33 cm.

NB Bookcase

The NB Bookcase is a single-sided or double-sided bookcase with elegant lines and extreme lightness of form. It consists of a freestanding modular structure with shelving and vertical dividers in polished aluminium, firmly fixed to a stainless steel base.

The shelving, the forms of which reproduce the original version in wood, can be equipped with a system of sliding glass doors and recessed LED lighting.
